What Would You Do
If you wanted to look out of a window and the shade was down?

Raise the shade, wouldn't you? That is just what we do for you with

GLASSES

There is some mechanical obstacle in the way of your seeing with clearness and ease. The focus of your eye lenses is faulty.

We cannot take these eye lenses out and make them over, but we can "neutralize" their defects with GLASS lenses—as truly a mechanical process as raising a shade, approaching the light or holding your paper OFF where you can see it best.

And, by the way, if you can't see to read comfortably at 14 inches, it will surely pay you to see us.
